DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-5 in the reply filed on 3/30/06 is acknowledged.
2. Claims 6-12, 13-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/30/06.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear what all is meant and encompassed by "*portions* of a radio broadcast". The applicant is advised to be more specific with "portion".

In claim 4, it is not clear what all is meant and encompassed by "primary band signal".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3663

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Simonds et al (US 2004/0093154).

Regarding claim 1, Simonds et al (figs. 1, 2, abstract; section. 0012-0014, 0040, 0042, 0109, 0111, 0114-116) disclose a system for dynamic alternative geographic route plotting using global positional satellite data, said system comprising:

an audio tuner 34 (figs 1&2), said audio tuner tuning frequencies for reception of radio broadcast signals;

a selection recognition engine 30 coupled to said audio tuner 34, said selection recognition engine 30 monitoring said radio broadcast signals (sec 0038, 0042) for pre-defined recording triggers (presence or availability of info; sec 0042) and selectively recording portions of a radio broadcast signal (sec 0012-0014), said selection recognition engine extracting anomaly information (weather, traffic, etc; sec 0042) from said recorded portions; and

a global positional satellite device 42 (fig. 1), said global positional satellite device receiving said anomaly information and generating at least one alternative route in response to said anomaly information (road construction, etc; sec 0116).

Regarding claim 2, Simonds et al (figs. 1, 2, abstract; section. 0012-0014, 0040, 0042, 0109, 0111, 0114-116) disclose the system of claim 1 further comprising an audio capture memory coupled to said selection recognition engine, said audio capture memory storing recorded portions of said radio broadcast signal (sec. 0012-0014).

Art Unit: 3663

Regarding claim 3, Simonds et al (figs. 1, 2, abstract; section. 0012-0014, 0040, 0042, 0109, 0111, 0114-116) disclose the system of claim 2, wherein said audio capture memory comprises at least one of random access memory, flash memory, a hard drive, optical drive, and optical-magnetic drive (sec 0039).

Regarding claim 4, Simonds et al (figs. 1, 2, abstract; section. 0012-0014, 0040, 0042, 0109, 0111, 0114-116) disclose the system of claim 1 wherein said radio broadcast signal comprises a primary band signal.

Regarding claim 5, Simonds et al (figs. 1, 2, abstract; section. 0012-0014, 0040, 0042, 0109, 0111, 0114-116) disclose the system of claim 1 further comprising a display.

MPEP 2114

7. The statement of intended use or field of use, "tuning frequencies for", "monitoring radio broadcast signals for", "recording/storing portions of", "extracting/receiving anomaly information from", etc clauses are essentially method limitation or statement of intended or desired use. Thus, the claim as well as other statements of intended use do not serve to patentably distinguish the claimed structure over that of the reference. See *In re Pearson*, 181 USPQ 641; *In re Yanush*, 177 USPQ 705; *In re Finsterwalder*, 168 USPQ 530; *In re Casey*, 512 USPQ 235; *In re Otto*, 136 USPQ 458; *Ex parte Masham*, 2 USPQ 2nd 1647. See MPEP § 2114 which states:

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from the prior art

Art Unit: 3663

apparatus” if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ 2nd 1647.

Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than functions. In re Danly, 120 USPQ 528, 531.

Apparatus claims cover what a device is not what a device does. Hewlett-Packard Co. v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528.

As set forth in MPEP § 2115, a recitation in a claim to the material or article worked upon does not serve to limit an apparatus claim.
